

ABOUT

Photoptics Conference 2027

Welcome to the forefront of light-based technologies!

We are delighted to extend our well-known invitation to the “**5th Laser International Conference on Photonics, Optics and Technology**”, a premier gathering of leading experts, researchers, scientists, engineers, innovators, students and postdoctoral fellows around the globe to explore the latest advancements and trends shaping the future of light-based technologies dedicated to the fascinating realm of Photonics, Optics and Lasers, which is scheduled Virtually (Webinar) during **March 23–24, 2027**.

This virtual **Photoptics Conference 2027** is organized by Sciencezo Planet which will provide a platform for interdisciplinary discussions dedicated to the latest developments, showcasing cutting-edge researches in **Quantum Photonics, Integrated Photonics, Ultrafast Optics, Bio-photonics and Medical Imaging, Silicon Photonics, Metamaterials and Nano-photonics, Optical Imaging and Sensing, Optical Metrology and Sensing, Light Emitting Diodes (LEDs) and micro-LEDs, Semiconductor Lasers, Optical Amplifiers, Fiber Lasers, Quantum Technologies with Lasers** and a myriad of related fields. This event promises to be a catalyst for collaboration, innovation, and breakthrough discoveries. Whether you are a seasoned professional, an early-career researcher, or a passionate enthusiast, this light-based technology conference offers a unique opportunity to expand your knowledge, network with peers, and contribute to the advancement of this rapidly evolving field. We look forward to welcoming you to this inspiring gathering of minds.

Sessions

- **Track 01:** Photonics, Optics and Laser
- **Track 02:** Nanophotonics and Photonic Crystals
- **Track 03:** Fast and Ultrafast Photonics
- **Track 04:** Solar Energy and Photovoltaics
- **Track 05:** Bio photonics and Medical Laser Applications
- **Track 06:** Nonlinear Photonics: Fundamentals and Applications
- **Track 07:** Photonic Networks and Devices
- **Track 08:** 2D Photonic Materials and Devices
- **Track 09:** Green Photonics in Industry and Infrastructure
- **Track 10:** Photonic Networks and Devices
- **Track 11:** Photonics in Artificial Intelligence
- **Track 12:** Optics & Lasers in Medicine
- **Track 13:** Adaptive Optics
- **Track 14:** Computational Optical Sensing and Imaging
- **Track 15:** Optical and Fibre Optical Sensors and Instrumentation
- **Track 16:** Biomedical Optics and Therapeutic Laser Applications
- **Track 12:** Optics & Lasers in Medicine
- **Track 13:** Adaptive Optics
- **Track 14:** Computational Optical Sensing and Imaging
- **Track 15:** Optical and Fibre Optical Sensors and Instrumentation
